Professional Summary

I'm a third-year AIML student who loves solving problems with code. I work well with teams and enjoy taking on new challenges. With experience in building web apps and learning machine learning, I'm always ready to grow my skills and make a positive impact wherever I go.

Skills

- Programming: Python, C, C++, Java
- Web Development: HTML, CSS, JavaScript
- Database: SQL
- App Development: Android Studio, React
- Soft Skills: Problem-solving, Team Management, Collaboration, Multitasking
- Languages: English, Hindi, Kannada

Education

- **B.E. in AI & ML**, SDMCET, Dharwad, 2023-2027 (CGPA: 9.51)
- **12th Grade**, Jawahar Navodaya Vidyalaya, Vijayapur (2023, CBSE) - 82%
- **10th Grade**, Jawahar Navodaya Vidyalaya, Vijayapur (2021, CBSE) - 81.33%

Professional Experience

- **Virtual Internship, Edunet Foundation (Front-End Web Development), 2025**
Completed a 6-week internship under AICTE & IBM SkillsBuild program. Developed a front-end project while learning modern web technologies and collaborating in mentor-led sessions.
- **App Development Intern, BlackSpire Pvt. Ltd., 2026**
Developing and enhancing mobile/web applications, implementing features, debugging issues, and improving performance as part of an internal product team.

Projects

- **Resume Relevance MVP**: Built a FastAPI/Streamlit tool to automatically evaluate resumes against job descriptions by extracting and analyzing required skills, outputting a relevance score, verdict, and missing skills. Supports PDF/DOCX uploads with instant results
- **AI-Based Crop Disease Detection System**: A deep learning solution that helps farmers detect plant diseases early through image analysis and provides sustainable, organic treatment suggestions.
- **MediAssist+ - AI-Powered Doctor Consultation App**: A mobile app for doctors to record patient consultations, convert speech to text, and generate structured medical summaries using AI. Doctors can securely log in, manage patients, record conversations, and get automated discharge-style reports. Built with React Native, Node.js, PostgreSQL, and local AI models.

Achievements & Extracurriculars

- Winner, Belagavi Zone Hockey Championship, SDMCET Team (2024-25)
- Actively play football.
